## **ICP1: Tools (GitHub and WebStorm)**

### **Objective:**

The goal of ICP1 is to learn about the tools GitHub desktop and webstorm IDE.

### **Programming elements:**

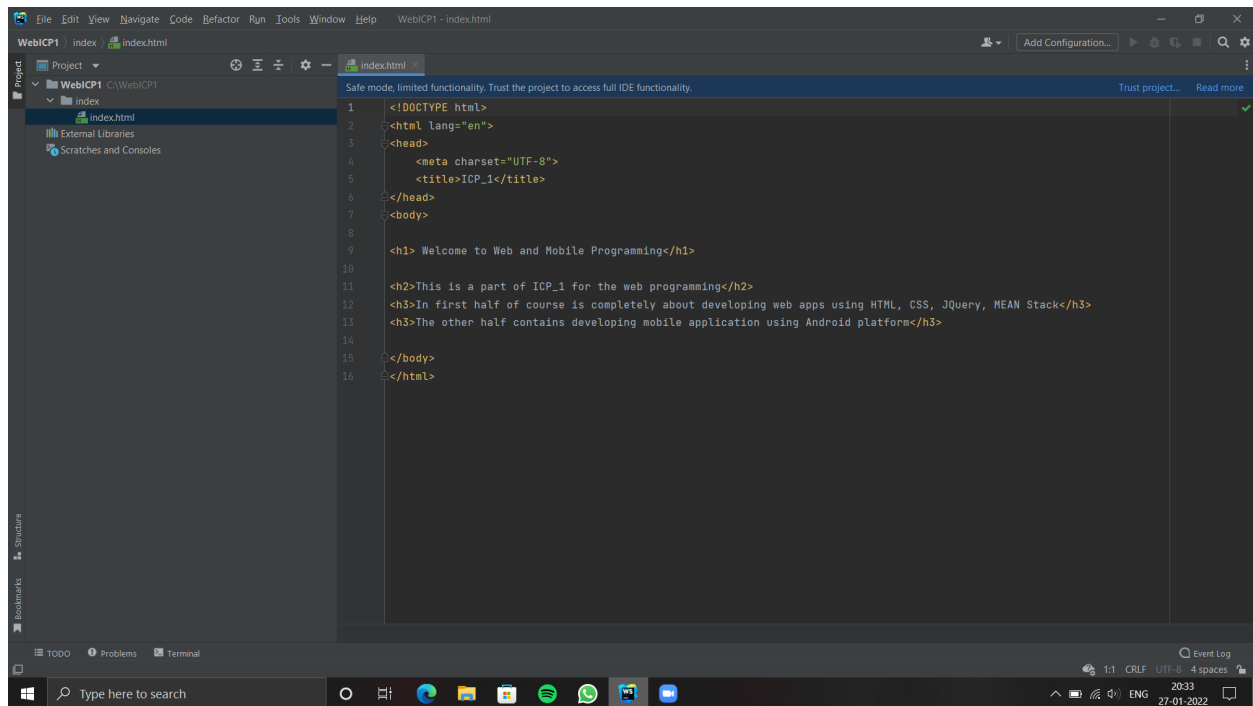

GitHub

### **Assignment:**

- I had already installed the webstorm.
- I created a Github account. I have created a repository for the ICP's and cloned them into my local machine using Github Desktop.
- I have created the index.html file and placed it in the folder.
- I have written the following in the readme file.  
In this I have created a public repository, Web-Mobile-Programming.
- Created an index.html file and placed it in the source folder.

- I have created a create text-file for my repo and made a pull request.
- I have created an issue and made a pull request to merge with the create text-file file and closed the issue.
- Created a Wiki page of ICP1 by mentioning the tasks that I did in Github.
- And I mentioned each and every point clearly in the wiki page by uploading the screenshots of what I have done in Github.

Code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <title>ICP_1</title>
6 </head>
7 <body>
8
9   <h1> Welcome to Web and Mobile Programming</h1>
10
11   <h2>This is a part of ICP_1 for the web programming</h2>
12   <h3>In first half of course is completely about developing web apps using HTML, CSS, JQuery, MEAN Stack</h3>
13   <h3>The other half contains developing mobile application using Android platform</h3>
14
15 </body>
16 </html>
```

- Created a page and named it as ICP1.
- And given the first heading of the web page as Welcome to Web and Mobile Programming.

- And next given the second heading of the web page as this is a part of ICP\_1 for web programming.
- The first half of the course is completely about developing web apps using HTML, CSS, JQuery.
- In the second part of the course, it contains developing mobile applications.
